London, U.K

PROFILE

I am a hardworking and dedicated self-taught software developer from the U.K. Designing and building useful digital apps and software has always been a strong interest of mine. I have a passion in software development that I wish to pursue in creating many cutting-edge technologies and digital apps. I will also be attending an Intensive six month Coding Bootcamp in the upcoming months of 2021 to solidify my knowledge and skills going forward.

EXPERIENCE

Node4 Ltd. - Site Reliability Engineer Intern

August 2020 - December 2020

A member of the Site Reliability Engineering team (SRE) at Node4. Created A **python flask** application presenting a **RESTful API, storing JSON data**. Migrated PRTG DCOps onto a new server with live data. Daily meetings with SRE team. Experienced the fast pace work flow of the tech industry.

NHS - Covid-19 Test Site Operative

January 2021 - Present

Part of a team that controlled and managed the flow of up to a thousand Covid-19 tests per day. I joined to positively help the COVID-19 situation and the NHS. I currently work at the Nottingham main test site. One the largest test sites in the UK.

Elizabeth Johnson Organisation - Student Leader

June 2017 - July 2019

For 3 summers, I had the responsibility of organising large groups of students, managing activities and leading educational events for over 200 international students, including trips to London, Winchester, Cambridge and Oxford. I also managed the social media for the company throughout the summer.

Next Ltd - Retail Sales Assistant

2015 - 2017

Whilst at school , in my holidays I was a member of the sales team. I worked on the shop floor throughout their busiest season, including the

Boxing Day Sales. This role gave me experience in a fast-paced environment, which could be transferred to a business environment.
